GPT 2 — Affiliate Offer Finder

Step 1 — Paste your "Trend Card"

*(In this mock, I'm assuming you pasted a card based on the niche: **How to get free leads**.)*

Trend Card (pasted):

- **Niche:** How to get free leads

- **Core angle:** Use simple lead magnets + short-form content + community-style outreach to generate opt-ins without paid ads

- **Audience:** Beginners doing affiliate marketing

- **Funnel:** 1-page opt-in → email follow-up → affiliate offer

- **Content:** 60-sec shorts + carousel posts + CTA to free resource

---

Step 2 — Web search results (Hard rules applied)

Hard rules enforced:

- ✅ Only **Launch Date after today** *(today = **Jan 2, 2026**)*

- ✅ Only offers with an **affiliate program source link (JV Page / partner link)**

- ✅ Excluded entries with **missing Launch Date**

Notes on required sources searched (and why some returned no eligible entries)

- **LaunchZilla:** I checked listings, but the ones surfaced either weren't relevant to "free leads," launched before **Jan 2, 2026**, or did not clearly show an affiliate/JV source link on the listing page. [Launchzilla+1](#)

- **Etsy / Amazon Associates / Google:** These commonly surface evergreen products (templates/books/tools) without a clear "launch date after today" per item, so they fail your hard rules. (Amazon Associates and Etsy do have affiliate programs, but product pages don't function as "launches" with future launch dates.) [Amazon Associates+2Etsy+2](#)
