- TikTok-Style Short Video Scripts (5) 25

So Here's The Output I Got From This GPT, For This Affiliate Offer I Was Promoting.

Bridge Page Copy

Headline Options

1. Build & Sell Simple Software in a Weekend – Even If You Can't Write a Single Line of Code
2. Talk Your Way to a WordPress Plugin: Vibe Coding Turns Ideas into Income in Hours
3. Stop Renting Other People's Tools – Use AI to Build Your Own and Keep the Profits
4. From "I Can't Code" to "I Sell Software" – The Beginner's Guide to Vibe Coding
5. Turn "Wouldn't It Be Cool If..." Ideas into Real Apps with ChatGPT & Claude

Subheadline Options

1. Discover how non-coders are using AI to build plugins, tools and SaaS-style apps they can sell – without hiring developers or learning PHP.
2. Vibe Coding shows you a step-by-step way to turn plain-English ideas into working software you can use, sell, or give away as bonuses.
3. Perfect for online marketers who are tired of bloated tools and overpriced devs – finally get exactly the software you want.

**What if this weekend you could "talk" a brand-new WordPress plugin into existence...
...without touching PHP, hiring a smug Fiverr coder, or praying three random plugins will somehow play nice together?**

That's exactly what vibe coding makes possible: having a conversation with AI (ChatGPT or Claude) that ends with you downloading a working plugin or app you can use or sell.

The guide you're about to see – "Vibe Coding. Your Secret Weapon" – is a beginner-friendly roadmap that shows non-coders how to do this in hours instead of weeks... and I've stacked some powerful extra bonuses for you when you grab it through my link.

Who This Is For

If you recognise yourself in any of these, keep reading:

- Online marketers who are tired of paying monthly for bloated tools that almost do what you want.
- WordPress site owners who juggle 3–5 plugins just to get one simple thing done.

- Affiliate marketers who'd love to offer unique tools and bonuses no one else can copy.
- Course creators, coaches, and consultants who want custom software to support their offers.
- "Non-techy" entrepreneurs who want software income without becoming developers.

If you can copy and paste, follow step-by-step instructions, and talk to an AI, this guide is built for you.

The Big Problem You're Facing

Right now you only have three options:

- Live with "close enough."
Keep stacking plugins and workarounds. Your site slows down, your admin gets messy, and you still don't get exactly what you want.
- Pay through the nose.
Hire a developer, hope they understand your vision, wait days or weeks, and pay for every tiny revision.
- Spend months learning to code.
Dive into PHP, JavaScript, CSS... and still not have time to build all the tools you dream about.

AI sounds like the escape hatch – but without a plan it can be a nightmare:

- AI confidently hands you broken code and "fixes" that break something else.
- Tiny tweaks cause "version drift" and suddenly features disappear.
- It invents functions and packages that don't exist.
- It forgets what it already built and bloats your plugin with fragile code.
- You don't know how to describe what you want in a way AI actually understands.

So you stay stuck using other people's tools and leave a LOT of money and efficiency on the table.

The New Way To Fix It

Vibe coding is different.

Instead of trying to become a developer, you become a project manager who talks to AI in plain English.

"Vibe Coding. Your Secret Weapon" gives you:

- A structured, proven process for building working software by chatting with AI.
- The "Proven Primer Prompt" you should start every Vibe Coding session with so the AI actually understands the project and your priorities.
- Best practices that help you get usable code faster, with fewer frustrating loops.
- Troubleshooting strategies to escape "it still doesn't work" debugging hell.

- A simple way to handle version drift so small changes don't break everything.
- A clear comparison between ChatGPT and Claude, with pros/cons and a simple recommendation.
- A mindset shift that turns "I can't code" into "I'm a software project manager who deploys tools."

The author couldn't write code, vibe coded a simple plugin to solve a real problem, and turned that into an extra \$2k in sales – plus a tool they can keep selling in funnels and sequences.

If a self-described "duffer" can do it, so can you.

Here's What You Already Get With This Product

When you order the "Vibe Coding. Your Secret Weapon" guide from the vendor, you're getting:

- The full beginner's guide to vibe coding
 - How to talk to AI so it understands what you want.
 - How to prevent 80% of AI misunderstandings with a simple confirmation approach.
 - How to avoid the "one thing" that creates tons of extra work and broken plugins.
 - How to use a low-cost paid AI subscription strategically to build multiple products.
 - Five starter project ideas and a section on going beyond WordPress into other apps and tools.
- **ACTION TAKER BONUS from the vendor:**
"Vibe Code Your First Plug-in" Workbook
 - Step-by-step prompts to build a Reading Time Estimator plugin from scratch.
 - Copy-and-paste instructions for ChatGPT or Claude.
 - Guidance on downloading the zip file, installing it, styling it, customising icons/text, adding a settings page, and more.
 - You finish with a polished plugin and the confidence to tackle your own ideas.

All of that is included on the main sales page directly from the creator of the product.

Your Exclusive Bonuses When You Order Through This Page

On top of everything the vendor gives you, when you grab Vibe Coding through my link on this page, you'll also unlock my personal bonus stack.

These bonuses are **not** on the main sales page.

They're **exclusive to this page** as a thank-you for using my affiliate link.

Bonus #1 – 30-Day “Idea-to-Plugin” Action Planner

One-page daily plan to take you from “nice idea” to working plugin in 30 days or less.

- Breaks the process into tiny, manageable actions so you never feel overwhelmed.
- Shows you exactly what to do each day: ideation, prompting, testing, polishing, launching.
- Keeps you focused on shipping something you can actually use or sell.

Bonus #2 – Profitable Plugin Prompt Pack

High-converting prompt templates for building money-making tools with AI.

- Done-for-you prompts to build link cloakers, bonus delivery tools, opt-in widgets, and more.
- Prompts crafted to reduce AI confusion and avoid common security/configuration mistakes.
- Plug-and-play: swap in your niche, offer, or funnel and go.

Bonus #3 – “Sell Your Plugin” Sales Page & Funnel Swipe File

Copy frameworks to launch your new tools fast – even if you’re not a copywriter.

- Proven sales page outline written specifically for simple WordPress plugins and small tools.
- Email and social media swipe copy to announce your new plugin and drive sales.
- Fill-in-the-blank sections so you can adapt it to any future plugin you build.

Bonus #4 – Support, Update & Bug-Fix Templates

Look professional from day one without writing every support reply from scratch.

- Email templates for common support questions (“It won’t install,” “It conflicts with X,” etc.).
- Simple update announcement templates to use when you ship new versions.
- A quick “error report” template you can paste straight into AI so it can fix issues faster.

Bonus #5 – Niche Plugin Idea Vault (50+ Starter Concepts)

Never get stuck wondering “what should I build next?”

- 50+ plugin and micro-tool ideas tailored to online marketers, affiliates, and content creators.
- Each idea includes who it’s for, what problem it solves, and a suggested “quick win” version.
- Use them to build your first plugin, or as a springboard for your own unique twist.

Again, these bonuses are **only** available when you purchase Vibe Coding through the link/buttons on this page. They’re my way of stacking even more value on top of an already under-priced guide.

What To Do Next

Step 1 – Click any button on this page

You’ll be taken to the official Vibe Coding sales page where you can see all the details directly from the creator.

Step 2 – Order your copy of “Vibe Coding. Your Secret Weapon”

Complete your purchase on the secure checkout. It’s priced way less than a single hour of developer time.

Step 3 – Claim your exclusive bonuses

After you order, forward your receipt to the email address on this page (or follow the bonus claim instructions) and I’ll send you:

- The 30-Day Action Planner
- Profitable Plugin Prompt Pack
- “Sell Your Plugin” Sales Page & Funnel Swipe
- Support & Update Templates
- Niche Plugin Idea Vault

So you’re not just getting the skill of vibe coding from the main guide...

You’re getting a complete ecosystem to **build, launch, and sell** your first software asset.

CTA Lines (use 2–3 across the page)

- 🖱️ Click here to grab Vibe Coding + my exclusive bonus bundle now.
- 🖱️ Yes, I want to build and sell my own software without learning to code.
- 🖱️ Send me to the Vibe Coding sales page so I can get started today.

5-Email Sequence

Email 1 – Big Idea / Story

Subject line options:

1. From “I Can’t Code” to “I Sold a Plugin for \$2k”
2. How to Talk a WordPress Plugin into Existence
3. The 4th Option Nobody Told Marketers About

Body:

You know that feeling when you’re hunting for a plugin or tool...
and everything you find is almost right, but never exactly what you want?

So you stack three plugins together.

Your site slows down.

And you still don’t get the feature you actually needed.

Until recently, your only choices were:

- Live with “close enough.”
- Hire an expensive developer.
- Or disappear down the rabbit hole of learning PHP & JavaScript.

Now there’s a fourth option:

Vibe coding.

Instead of writing code, you have a conversation with AI (ChatGPT or Claude).

You explain what you want in plain English.

The AI writes the code.

You test, tweak, and improve it in simple cycles.

The creator of a guide called “**Vibe Coding. Your Secret Weapon**” did exactly that:

They couldn’t write code.

They vibe coded a simple WordPress plugin to solve their own problem.

Sold it.

And pulled in an extra \$2k – on top of having the tool they needed.

Inside the guide, you’ll see:

- The “Proven Primer Prompt” to kick off every project the right way.
- How to avoid the AI hallucinations, version drift, and broken updates that drive most people mad.

- A step-by-step bonus workbook that walks you through building your first plugin in about an hour.

When you grab the guide through my link, you'll also get my **exclusive bonus stack** designed to help you plan, build, and sell your own tools faster (details on the page).

👉 Click here to check out Vibe Coding + my exclusive bonuses: [YOUR LINK]

If you've ever thought "Wouldn't it be cool if there was a tool that did X...", this is how you finally make it happen.

Email 2 – Teaching / Value

Subject line options:

1. The #1 Reason AI Gives You Useless Code
2. Why Your "Small Change" Keeps Breaking Everything
3. Read This Before You Ask ChatGPT to Code Anything

Body:

Most people think the secret to using AI for coding is the AI itself.

"Maybe I just need a better model..."

"Maybe I should jump to a paid plan..."

That helps.

But there's a bigger factor:

👉 **How you talk to the AI.**

If you:

- Don't set expectations at the start,
- Don't confirm that it truly understands your project,
- Don't know how to handle "version drift"...

You can end up with:

- Code that *looks* right but breaks your plugin.
- Updates that quietly erase features you liked.
- Weird, bloated apps that feel like a Jenga tower.

The Vibe Coding guide walks you through a **structured way** to work with AI so you get usable results much faster:

- A primer prompt that sets the stage and prevents 80% of misunderstandings.

- A simple “confirmation phrase” process to make sure AI really gets what you’re asking.
- A method for making small changes without blowing up what already works.
- Troubleshooting steps to escape endless “it still doesn’t work” loops.

And the best part?

You don’t need to understand the code.

The guide even shows you how to copy error messages and feed them back to AI so it can fix the problem for you.

On top of that, when you order through my link, I’m giving you:

- A 30-Day Idea-to-Plugin Action Planner so you actually ship something.
- A Profitable Plugin Prompt Pack for tools you can sell or bundle with your offers.
- Sales page and support templates so you look pro from day one.

👉 See everything you get with Vibe Coding + my bonuses here: [YOUR LINK]

Even if you never thought of yourself as “technical,” this process can help you build real, working software you control.

Email 3 – Proof / Objections

Subject line options:

1. “But I’m Not Tech-Savvy...” (Read This)
2. What if I Break My Site? 🤖
3. Can You *Really* Sell Plugins if You Can’t Code?

Body:

Let’s tackle the big objections head-on.

“I’m not tech-savvy.”

If you can:

- Follow step-by-step instructions,
- Copy and paste text,
- Upload a plugin to WordPress...

You can handle this.

The Vibe Coding guide is written specifically for non-coders. It treats coding like a conversation, not a programming class. You explain what you want; AI writes the code; the guide tells you what to do next.

“What if the AI messes up?”

It will. Sometimes.

That’s why the guide shows you:

- How to spot when AI has gone off the rails.
- How to roll back to a working version.
- How to explain errors to AI without understanding the technical jargon.
- How to avoid the “version drift” trap that causes older features to vanish.

“What if I break my site?”

WordPress has your back:

- You can deactivate any plugin with one click.
- You can delete it if something really goes wrong.
- The guide recommends testing and saving working versions so you’re never stuck.

“Can I really sell what I build?”

Yes.

Marketers are already selling simple plugins and tools for \$17, \$27, \$47 and more. Even a modest plugin that sells 20 copies at \$27 brings in \$540.

No guarantees, of course – but the potential is very real.

The creator of this guide vibe coded a simple plugin, solved their own problem, and pocketed an extra \$2k in the process.

When you order through my link, you get the full Vibe Coding system **plus**:

- My Sales Page & Funnel Swipe File for your first (or next) plugin.
- Niche Plugin Idea Vault so you’re never staring at a blank page.
- Templates that help you answer support questions like a pro.

👉 Click here to grab Vibe Coding + my exclusive bonus bundle: [YOUR LINK]

If these objections have been holding you back, this is your sign that there’s an easier, safer way to step into software.

Email 4 – Closing Soon

Subject line options:

1. I May Pull These Bonuses Next...
2. Vibe Coding + My Bonus Stack (While It's Still Available)
3. Before I Stop Talking About This...

Body:

Quick heads up:

I don't keep every promotion – or every bonus bundle – running forever.

Vibe Coding is a skill you can use for years.

But my **exclusive bonuses** on top of the main offer are something I control... and I reserve the right to change or remove them without notice.

If you've been thinking:

- "I should really learn how to build my own tools."
- "I'd love to have a simple plugin I can sell."
- "I'm tired of paying monthly for stuff that doesn't quite fit..."

Then this is the best combo you'll see:

From the vendor, you get:

- "Vibe Coding. Your Secret Weapon" guide.
- The "Vibe Code Your First Plug-in" workbook to build a real plugin in about an hour.

From me (only via my link), you get:

- 30-Day Idea-to-Plugin Action Planner.
- Profitable Plugin Prompt Pack.
- "Sell Your Plugin" Sales Page & Funnel Swipe.
- Support & Update Templates.
- Niche Plugin Idea Vault.

Together, that's everything you need to:

- Turn one idea into a simple plugin,
- Launch it properly, and
- Have a system to do it again.

👉 If you want access to my full bonus stack, now's the time: [YOUR LINK]

Once I move on to other promotions, I may retire or change this bundle.

Email 5 – Last Call

Subject line options:

1. Last Time I'll Nudge You About This
2. Final Reminder: Build Your Own Tools, Not Just Buy Them
3. One Skill That Can Pay You Back for Years

Body:

This will be the last email I send you about Vibe Coding (and my bonus bundle).

So if you've skimmed the previous ones, here's the short version:

- You're already paying for tools every month.
- You've already had ideas like "I wish there was a plugin that did X."
- AI has reached the point where you can literally talk those ideas into working software.

The missing piece?

A **beginner-friendly process** that:

- Keeps AI on track.
- Avoids common traps like version drift and bloated code.
- Helps you build something real in hours, not months.

That's exactly what "**Vibe Coding. Your Secret Weapon**" gives you – plus a hands-on workbook that walks you through building your first plugin.

When you order through my link, I'm also giving you:

- A plan to go from idea to shipped plugin in 30 days or less.
- Prompts for money-making tools you can use or sell.
- Copy swipes, support templates, and idea lists so you're never stuck wondering "What now?"

No promises, no guarantees.

But owning the skill to create your own tools, instead of only buying other people's, can open up a lot of potential income streams and save you a ton of time.

👉 If you want in, click here now to get Vibe Coding + my exclusive bonuses: [YOUR LINK]

After this, I'm moving on to other topics – so if this resonates, don't leave it sitting in the "maybe later" pile.

Social Posts – 5 Angles x 5 Platforms

Post:

SaaS costs rising. Plugin stacks getting messier.

One under-used strategy for online business owners right now:

Use AI to build micro-tools and plugins tailored to your own workflows.

A guide called “*Vibe Coding. Your Secret Weapon*” walks non-coders through a structured way to talk to AI (ChatGPT/Claude) and end up with working software they can use or sell.

I’ve arranged an exclusive bonus bundle when you purchase through my link:

- 30-Day Idea-to-Plugin Action Planner
- Profitable Plugin Prompt Pack
- Sales Page & Funnel Swipe File
- Support & Update Templates
- Niche Plugin Idea Vault

If you’d like to own the skill of creating your own tools instead of just renting them, this is a solid place to start.

Angle 2 – Teaching / Value: Avoid the AI Coding Traps

Instagram

Caption:

AI can write code... but it can also happily hand you a broken plugin and say “you’re welcome.” 😏

The difference between a mess and a working tool is **process**:

- ✅ The right primer prompt
- ✅ Clear confirmation steps
- ✅ A plan to handle “version drift”
- ✅ Simple ways to roll back when something breaks

That’s exactly what the *Vibe Coding. Your Secret Weapon* guide walks you through – in plain English, for non-coders.

Grab it through my link and I’ll send you my exclusive bonuses to help you ship and sell your first plugin faster: planner, prompt pack, sales page swipe, support templates + idea vault.

👉 Link in bio to see everything included.

X (Twitter)

Post:

Asking AI to “write a WordPress plugin that does X” without a process is the fastest way to break stuff.

Vibe Coding gives you a structured way to talk to AI so you get usable code, not chaos.

I recommend the *Vibe Coding. Your Secret Weapon* guide + I’m adding my own bonuses when you grab it via my link.

👉 Learn the process + get my extras: [YOUR LINK]

Facebook

Post:

AI is powerful... but if you don’t know how to brief it properly, you’ll get:

- ❌ Broken code
- ❌ Features that disappear after “one small change”
- ❌ Confusing, bloated plugins

The Vibe Coding guide shows you how to:

- Start every project with a smart primer prompt
- Confirm that AI actually understands what you want

- Handle version drift without losing your progress
- Fix issues by pasting error messages back into AI (without knowing what they mean)

I've put together an exclusive bonus stack to go with it: planner, prompts, sales copy, support templates and an idea vault.

Final Reminder: Learn Vibe Coding + Get My Bonuses

Description:

Last call from me on this: Vibe Coding is a step-by-step guide for using AI to build your own plugins and tools. When you get it through my link, you also unlock my exclusive bonuses for planning, launching and supporting your first plugin. If that sounds useful, click through now to see what's included. 👉 [YOUR LINK]

TikTok-Style Short Video Scripts (5)

Script 1 – Big Idea: Talk Your Plugin Into Existence

[Hook – first 3 seconds]

On-screen text: “What if you could TALK a plugin into existence?”

You: “What if you could build a WordPress plugin this weekend... just by talking to AI?”

[Body]

[Cut to you, casual]

“You don’t need to learn PHP. You don’t need to hire a Fiverr dev who disappears halfway through the project.

There’s a process called **vibe coding** where you literally have a conversation with AI – like ChatGPT or Claude – and it writes the code for you.

A guide called ‘*Vibe Coding. Your Secret Weapon*’ breaks it down for complete non-coders.

You get a simple framework, plus a workbook that walks you through building your first plugin in under an hour.

The creator used this to vibe code a simple plugin and pulled in an extra \$2k... without being a developer.”

[CTA]

[On-screen text: “Link in bio for guide + my bonuses”]

You: “If you want to see how it works – and get my exclusive bonuses on top, like planners, prompts, and sales copy – hit the link in my bio and grab Vibe Coding through my page.”

Script 2 – Teaching: Avoid AI Coding Nightmares

[Hook]

On-screen text: “Stop letting AI break your plugins 😬”

You: “AI can write code... but it can also quietly wreck your site if you don’t use it properly.”

[Body]

You: “Here’s the problem. Most people jump into ChatGPT and type ‘write me a WordPress plugin that does X.’

Then they get:

- Broken code
- Features that vanish when they ask for a small change
- Plugins that just feel... fragile

The missing piece is a **process**.

The Vibe Coding guide shows you how to:

- Start every project with a ‘primer prompt’ that sets expectations

- Confirm AI actually understands what you want
- Handle 'version drift' so small edits don't blow everything up
- Feed error messages back into AI so it can fix things without you knowing any code

It's all written in plain English for non-techy people."

[CTA]

[On-screen, show a quick bullet list of your bonuses]

You: "If you want that process, plus my exclusive bonus pack with prompts, planners and templates, tap the link in my bio and grab Vibe Coding through my link."

Script 3 – Proof / Objections: "I'm Not Tech-Savvy"

[Hook]

On-screen text: "Not tech-savvy? Perfect."

You: "If you think 'I can't code'... you're actually the person this is for."

[Body]

You: "The whole idea behind Vibe Coding is that you're **not** a developer.

You're a marketer, a creator, a business owner.

If you can follow instructions, copy and paste, and upload a plugin... you can use AI to build tools.

The guide I'm using – '*Vibe Coding. Your Secret Weapon*' – is written for beginners.

It shows you how to:

- Talk to AI in normal language
- Install and test the plugin it gives you
- Safely deactivate or delete it if something goes wrong
- And there's even a workbook that walks you through building your first plugin step-by-step.

The author vibe coded their own plugin, solved a problem, and made an extra \$2k. If they can do it, so can you."

[CTA]

You: "Want to learn the same process – plus get my planner, prompt pack, sales copy and more? Hit the link in my bio, grab Vibe Coding through my page, and I'll send you my exclusive bonus stack."

Script 4 – Closing Soon: Bonus Stack May Change

[Hook]

On-screen text: “I might pull these bonuses next...”

You: “Quick PSA if you’ve been eyeing my Vibe Coding bonus bundle.”

[Body]

You: “The Vibe Coding guide itself is a long-term skill. You grab it once, you can use the process for years.

My bonus stack on top of it? That’s something I can change or remove whenever I want.

Right now, when you get Vibe Coding through my link, you also get:

- A 30-day idea-to-plugin planner
- A profitable plugin prompt pack
- Sales page & funnel swipe file
- Support & update templates
- A niche plugin idea vault

It’s basically everything you need to go from idea → plugin → sales.”

[CTA]

[On-screen text: “Tap link in bio while it’s still live”]

You: “If you want the guide AND my bonuses together, tap the link in my bio and grab it while this bundle is still up.”

Script 5 – Last Call: Final Nudge

[Hook]

On-screen text: “Last time I’ll mention this 📌”

You: “This is the last time I’m going to talk about Vibe Coding for a while, so listen up if this has been on your mind.”

[Body]

You: “If you:

- Are tired of paying monthly for tools that almost do what you want
- Have plugin ideas you never built
- Like the idea of selling a simple tool or bundling it with your offers...

...then learning vibe coding is a very practical move.

The *Vibe Coding. Your Secret Weapon* guide + workbook walk you through the process, even if you’re not technical.

And when you grab it through my link, I’m also giving you my full bonus stack – planner, prompts, sales copy, support templates, and an idea vault – so you can actually launch something.”

[CTA]

[On-screen text: "Guide + bonuses → link in bio"]

You: "If that sounds like something you want in your skillset, hit the link in my bio now, grab Vibe Coding through my page, and I'll send you all the bonuses as soon as you're in."
